

RF-Range Tester

Installation and Specification Tool

Features:

- A unique and invaluable tool for specifying and installing your wireless installation.
- Kit comes complete with transceiver that replicates the panel. Simply place it where you propose to locate the panel and commence testing your devices
- Simple to use – place the range test wand where you wish to install the sensor and press the appropriate button to emulate the detector you wish to install - you will get immediate audio and visual feedback on the signal strength.
- The wand will allow you to record audio notes for your installer or to aid the drafting of your specification.
